Claim Rejections - 35 USC § 103

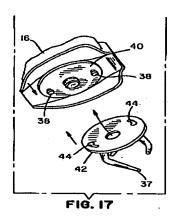

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 16,17,22,23,29,30,31,32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Straayer (4,501,332) in view of Marshall et al. (6,340,061).

Straayer discloses a rotary cultivator comprising a tubular handle member, a cultivator tool, a motor drive unit, and a flexible drive element. Straayer however lacks the cultivator tool comprising a circular flange with tine formations angled inwardly.

Marshall et al. shows that a cultivator tool comprising a circular flange with inwardly angled tines is an equivalent structure known in the art (fig. 17). Therefore, because these two cultivating means were art-recognized equivalents at the time the invention was made, one or ordinary skill in the art would have found it obvious to substitute a cultivating tool similar to that of Marshall et al., for the cultivating tool of Straayer.

It is further noted that although Straayer does not specify that the drive motor is electric, Marshall et al., teaches that it is known in the art to use an electric motor powered by batteries with a cultivating tool. Electric motors are quieter and cleaner than gas powered motors.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device of Straayer by using a battery powered electric motor as taught by Marshall et al., because battery powered electric motors are quite and clean.

Claims 18-21,24,28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Straayer (4,501,332) in view of Marshall et al. (6,340,061) as applied to claims 16,22,23,29,30 above, and further in view of Lidstone (3,129,771).

Straayer as modified by Marshall et al., discloses the rotary cultivator as disclosed previously, but lacks disclosing a portable drill.

Lidstone discloses a similar rotary cultivator and further discloses a portable drill 6 as indicated in col. 1, lines 37-40. It is seen as an obvious matter of design choice to use a portable drill as the motor of Straayer because a portable drill is a suitable driving means for a rotary cultivator as taught by Lidstone

Regarding claim 24, common electric drills include internal torque limiting clutches.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor Batson whose telephone number is (571) 272-6987. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Will can be reached on (571) 272-6998. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
